

cnMaestro: Network Management...Simplified

- Devices discover cnMaestro Controller
- Firewall-friendly -- all traffic over HTTPS
- Access from anywhere using a standard Web browser
- Full visibility from tower to edge
- Easy to create an account and get started!
- Complete Life-Cycle Solution
- *And, it requires no licenses!*

cnMaestro

The screenshot displays the cnMaestro web interface in a browser window. The header shows the Cambium Networks logo and navigation links for Register, Help, and Sign In. The main banner features the cnMaestro logo with the tagline "Integrated. Intelligent. Easy." and a list of functions: Monitor, Configure, Operate, and Manage, followed by "Your Network". A tablet in the foreground shows the dashboard interface. Below the banner, there is a "Join Cambium" section with a "Create a Company Account" button and a "Sign In" button. The "Sign In" button is highlighted. Below this, there are three sections: "Documentation" (Everything you need to know about Cambium cnMaestro), "Community" (Join in the discussion with network operators around the world and share your expertise), and "Support" (Contact Technical Support team 24x7 to resolve issues and keep your network running smoothly).

Join Cambium
Get quick access to resources that help you manage your Cambium Networks products.

[Create a Company Account](#) [Sign In](#)

A Company Account allows you to manage your devices. Create an account for your company. You can also be invited to manage an existing account - contact the administrator of the account to receive an email invitation.

Login using your Cambium user login... the same login you use to access the Cambium Community and Support Center. If you don't have a user login yet, [click here to register](#).

Documentation
Everything you need to know about Cambium cnMaestro.

Community
Join in the discussion with network operators around the world and share your expertise.

Support
Contact Technical Support team 24x7 to resolve issues and keep your network running smoothly.
